Subject index

Key: c = correspondence; e = editorial; r = review article; S = supplement

A

Acute myocardial infarction
  thrombolysis after left heart catheterisation : is it safe? 501
Acute renal failure
  continuous extracorporeal renal support in children 315
  monitoring of PMN elastase levels during dialysis 52
  nondilated anuric obstructive nephropathy 387
  nutrient balance during CAVHD 399
  outcome in medical ICU 19
  role of continuous haemofiltration in children 311e
Acute respiratory failure
  combined CPAP and minitracheotomy 57
  during experimental pneumocystis carinii pneumonia , effects of surfactant replacement 475
  pulmonary circulation in acute lung injury 254r
Acyclovir
  clearance during CAVHD 125c
Adrenaline
  in treatment of septic shock 36
Adult respiratory distess syndrome (ARDS)
  associated with adult Still's disease 372c
  Experimental effect of single inflation of lungs during $ECCO_2R$ 469
  HFJV in children 209
  leukotrienes and ARDS 65c, 66c
  leukotrienes in BAL fluid 1
  non-hypoxic bradycardia during recovery phase of ARDS 494
  recovery after high-dose corticosteroids 241c
  static respiratory compliance measured by automated single-volume steps 108
  total extracorporeal lung assist 73
Airway obstruction
  due to erysipelas 370
  following near-drowning in chlorinated water 306c
  HFJV in a model simulating upper airway stenosis 479
Airway pressure
  CPAP with and without IPS at constant mean airway pressure 461
  effect of different ventilatory modes in piglets with respiratory distress 225
  effect of six ventilatory modes in a piglet model with normal lungs 169
Analgesia
  midazolam and alfentanil for sedation in the ICU S20
Antibiotics
  levels in serum and bronchi during SDD 215
Arrhythmia
  non-hypoxic bradycardia during recovery phase of ARDS 494
  ventricular, ajmaline in non-responders to lidocaine 306c
Asthma
  respiratory mechanics and gas exchange 506c

B

Benzodiazepines
  acute intoxication in Florence : a comparative study S24
  flumazenil in acute drug poisoning S32
  flumazenil in treatment of acute portal encephalopathy S39
  for sedation in ICU patients S11
  for sedation of PICU patients S15
  pharmacology of midazolam and flumazenil S1
Blood cultures
  quantitative, for diagnosis and management of catheter-related sepsis 30
Blood gases
  transcutaneous oxygen and carbon dioxide measurements 272
Book reviews
  ARDS 374
  clinical applications of ventilatory support 374
Brain death
  evoked potentials for monitoring of 87
  hepatic mitochondrial redox state in, 103
Broncho-alveolar lavage (BAL)
  leukotrienes in pulmonary edema 1
  whole lung, in pulmonary proteinosis, hemodynamic effects 421

C

Carbon dioxide
  End-tidal colorimetric determination 63
    for monitoring of pulmonary blood flow 98
Cardiac arrest
  hyperthermia following resuscitation 419
  prognostic significance of intracranial and cerebral perfusion pressure in anoxic coma 392
  prolonged, two-stage resuscitation of the cat brain 410
Cardiac output
  bioimpedance vs thermodilution after coronary bypass surgery 383
  by transthoracic electrical impedance, effect of haematocrit 178
Cardiac pacing
  non hypoxic bradycardia during recovery from ARDS 494
Catecholamines
  accuracy of Biox 3700 oximeter in patients receiving 484
  Adrenaline
    in treatment of septic shock 36
    endoscopic, for severe peptic ulcer haemorrhage 281
  and oxygen consumption during weaning 199
  Dopamine
    and dobutamine, effects on hepatic blood flow during porcine peritonitis 487
    and hepatic mitochondrial redox state in brain death 103
  dopaminergic agents in vital organ perfusion 246
Central venous catheter
  acute pulmonary emboli associated with guidewire exchange 115
  breast abscess following, 123
  located in persistant left superior vena cava in children 497
  pulmonary artery and cardiac pacing in a patient with, 507c
  sepsis : quantitative blood cultures for diagnosis and management 30
  subclavian vein catheterization in children 350
Cerebral blood flow
  advances in monitoring acutely injured brain 191e
  monitoring with jugular bulb catheterization 195
Colloids
  complement and fibronectin following infusion of, 83
  hemodilution with hydroxyethylstarch vs. 4% albumin 141
Coma
  endocrine abnormalities in severe head trauma : a clue to prognosis? 25
  evoked potentials for monitoring of coma 87
  myxoedema : response to thyroid hormones 16
  post-cardiac arrest : prognostic significance of early intracranial and cerebral perfusion pressures 392
Complement
  and fibronectin, following colloid infusion 83

Compliance
respiratory, measured by automatic single-volume steps 108
Conference reports
dopaminergic agents in vital organ perfusion 246
the use of the pulmonary artery catheter I–VIII
tissue oxygen utilization 67
Continuous arteriovenous haemodialysis (CAVHD)
acyclovir clearance during 125c
continuous hemodiafiltration : influence on nutrient balances 399
during emergency hepatic retransplantation 241c
myoglobin clearance during 509c
prolongation of filter life with prostacyclin 187c
via axillary artery and vein 187c
Corticosteroids
for recovery of ARDS 241c
improvement of late septic shock with physiologic doses 436
Continuous positive ariway pressure (CPAP)
and minitracheotomy : a caution 436c
combined with minitracheotomy in acute respiratory failure 57
with and without IPS in acute respiratory failure 461
with a Siemens Servo 900C ventilator for weaning in infants 189c
Cyanide intoxication
effect of hydroxocobalamin on myocardial contractility 175

D
Dopamine
and hepatic mitochondrial redox state in brain-dead patients 103

E
Emphysema
HFJV in experimental emphysema 377
Encephalitis
herpes simplex, evoked potentials in, 94
oxalate-induced after infusion of sugar surrogates 432
End-tidal CO_2
colorimetric determination 63
monitoring for assessment of pulmonary blood flow 98
Endotoxin
EVLW and lung mechanics during haemofiltration in a porcine shock model 293
Enteral feeding
cisapride for treatment of gastric paralysis 508c
oesophageal obstruction during nasogastric feeding 302
European Society of Intensive Care Medicine
expert panel report : the use of the pulmonary artery catheter I–VIII
Newsletter XIV 308
Euthanasia
euthanasia 243c
Evoked potential
in herpes simplex encephalitis 94
monitoring in comatose patients 87
Exchange transfusion
in severe falciparum malaria 449
TNF levels during exchange transfusion in malaria 245c
Extra-vascular lung water (EVLW)
and lung mechanics during haemofiltration in porcine endotoxic shock 293
Extracorporeal membrane oxygenation (ECMO)
$ECCO_2R$
effect of single inflation of the lung 469
the ECMO saga 69e
total extracorporeal lung assistance 73

F
Fibronectin
and complement following infusion of colioids 83
Free radicals
lipid peroxides and antioxidants in septic shock 40
scavengers : protection against acute gastric mucosal injury 455

H
Haemofiltration
Continuous
continuous extracorporeal renal support in children 315
hemodynamic effects 435c
lung mechanics and EVLW in porcine endotoxic shock 293
role in acute renal failure in children 311e
treatment of septic shock and multiple organ failure 372c
Intermittent
haemodynamic effects 346
Haemophilus influenzae
septicemia, and spontaneous splenic rupture 188c
Head injury
advances in monitoring acutely injured brain 191e
endocrine abnormalities after, 25
evoked potential for monitoring of 87
intracranial pressure and rigid cervical collars 504
PET scan and outcome in vegetative state 149
Hematocrit
effect on measurement of cardiac output by transthoracic electrical impedance 178
Hemodilution
with hydroxyethyl starch vs. albumin 141
Heparin virus
induced thrombocytopemia
and hemofiltration/hemodialysis 437c
recovery of 185c
severe white-clot syndrome 185c
with bilateral adrenal hemorrhage 238
low molecular weight
monitoring of PMN-elastase during dialysis 52
Hepatic
Blood flow
during porcine peritonitis, effects of dobutamine on, 487
Herpes
encephalitis, evoked potentials in 94
High frequency jet ventilation (HFJV)
editorial 375e
in a model simulating upper airway stenosis 479
in children with ARDS 209
in experimental pulmonary emphysema 377
High frequency positive-pressure ventilation (HFPPV)
comparison of six modes of ventilation in pigs with normal lungs 169
Hyperbaric oxygen
for acute carbon monoxide intoxication in pregnancy 289
Hyperlucent lung
due to unilateral mucus plugs 121
Hyperthermia
following cardiopulmonary resuscitation 419
Hypertriglyceridemia
acute, during pregnancy : treatment with lipoprotein apheresis 236
Hypokalemia
during barium carbonate intoxication 60
Hypothermia
related to air-fluidized bed 186c, 506c

I
ICU
Cost
management of resources in ICU 127e
of an ICU : a prospective study 204
measuring nursing workload with TOSS 340
Outcome
and invasive monitoring in Finland 264
comparison of APACHE II with subjective assessments 159
in ICU pediatric oncology patients 11
measuring quality of life with the sickness impact profile 285
of acute renal failure in medical ICU 19
short and long term in elderly patients, 7
simplification of the SAPS by independant variables 164

Infection transmission
to personnel : procedure-related rate of contact with patient body fluid 276
Intoxication
acute intoxication in Florence : a comparative study S24
barium carbonate 60
carbon monoxyde, and hyperbaric oxygen during pregnancy 289
chloroquine poisoning : amrinone for cardiogenic shock 430
cyanide : effect of hydroxocobalamin on rat papillary muscle 175
flecainide : detoxification with activated charcoal hemoperfusion 181
severe theophylline toxicity treated with oral activated charcoal 244c
trichlorethylene poisoning by ingestion 234
use of flumazenil in management of, S32
Intracranial pressure
and rigid cervical collars 504
for monitoring of acute brain injury 191e
increase with urapidil 190c
is not increased by jugular bulb catheterization 195
prognostic significance in post-cardiac arrest anoxic coma 392

L
Lactate
and mixed veno-arterial PCO_2 gradient, indices of poor peripheral perfusion 320
Left ventricule
association of true and false aneurysm 243c
Leukotrienes
and ARDS 65c, 66c
in BAL fluid of patient with non-cardiogenic pulmonary edema 1
Lipid
hypertriglyceridaemia associated with prolonged propofol administration 424
Lymph flow
thoracic lymph drainage in dog 45

M
Malaria
severe falciparum malaria 449
TNF levels during exchange transfusion 245c
Mechanical ventilation (MV)
effects of different ventilatory modes on piglets with severe respiratory distress 225
effect of single inflation of the lungs during $ECCO_2R$ 469
effects of six ventilatory modes in a piglet model with normal lungs 169
evaluation of techniques for diagnosis of nosocomial pneumonia 439r
HFJV in children with ARDS 209
plasma catecholamines and VO_2 during weaning 199
SIMV and pressure support: effect on VA/Q distributions during weaning 136
Monitoring
evaluation of a computer-based cardiac arrest alarm 359
Multiple inert gas elimination technique (MIGET)
and VA/Q distribution, effect of SIMV and pressure support ventilation 136
Multiple organ failure (MOF)
energy expenditure in patients with MOF 403
outcome of acute renal failure 19
pharmacokinetics of theophylline and ethylenediamine 465
Myocardial contractility
effect of hydroxocobalamin on rat cardiac papillary muscle 175
Myoglobin
clearance during CAVHD 509c
Myxoedema
coma, response to thyroid hormones 16

N
Near-drowning
in chlorinated water, with complete airway obstruction 306c
Nosocomial infections
Catheter-related sepsis
quantitative blood cultures for diagnosis of 30
breast abscess following 123
evaluation of diagnostic techniques 439r
prediction of risk with severity indices in ICUs 336
Sinusitis
comparison of endotracheal vs. nasotracheal intubation 125c
Nutrition
oesophageal obstruction during enteral feeding 302
nutrient balances during CAVHD 399
energy expenditure in patients with MOF 403
oxalate-induced encephalitis after infusion of sugar surrogates 432

O
Organ transplant
Liver
CAVHD during emergency retransplantation 241c
hepatic mitochondrial redox state in brain death 103
Oxygen
Consumption
daily variation and relationship with the sick-euthyroid syndrome 325
VO_2
and catecholamines during weaning 199
cost of breathing during weaning 193e
Dissociation curve
P50 is reduced in critically ill patients 355
Tissue oxygenation
assessing tissue perfusion 71e
blood lactate and mixed veno-arterial PCO_2 gradient as indices of poor peripheral perfusion 320
comparison of subcutaneous oxymetry and gastric intramucosal pH 78
factors influencing transcutaneous oxygen and carbon dioxide measurements 272
respiratory changes after open-heart surgery 365
Transport
effect of adrenaline in septic shock 36

P
Pancreatitis
current therapeutic strategies 189c
due to hypertriglyceridemia during pregnancy 236
Pediatric intensive care
method to evaluate rationing of PICU beds 154
prognosis of oncology patients 11
quantitative blood cultures for diagnosis and management of cathether-related sepsis 30
Sedation with midazolam S15
Pericardial tamponnade
recurrent, managed with percutaneous balloon pericardiostomy 299
PET-Scan
in vegetative state after head trauma 149
Pharmacokinetics
of benzodiazepines in ICU patients S11
of midazolam and alfentanil during sedation S20
of theophylline and ethylenediamine in MOF 465
midazolam and flumazenil in ICU S1
Pneumocystis carinii
experimental pneumonia in rats, effects of surfactant replacement 475
Portal systemic encephalopathy
use of flumazenil for treatment of, S39
Positive end expiratory pressure (PEEP)
during HFJV in a model simulating tracheal stenosis 479
Pregnancy
hyperbaric oxygen for acute carbon monoxide intoxication 289
lipoprotein apheresis for acute hypertriglyceridemia 236

Pressure support ventilation
and SIMV during weaning 136
with CPAP in acute respiratory failure 461
Prognosis
comparison of APACHE II with subjective assessments 159
in elderly patients following ICU care 7
of pediatric ICU oncology patients 11
Proteinosis
hemodynamic changes during whole bronchoalveolar lavage 421
Pulmonary artery
Hypertension
in acute lung injury 254r
Arterial catheter
invasive monitoring in ICUs in Finland 264
Pulmonary artery catheter
and cardiac pacing in a patient with persistent left superior vena cava 507c
Pulmonary edema
Blood flow
during acute lung injury 254r
end-tidal CO_2 for measurement of, 98
cardiogenic and non-cardiogenic, leukotrienes B_4 in BAL fluid 1
Emboli
associated with guidewire exchange of central catheter 115
Hemorrhage
Wegener's granulomatosis presenting as, 118
thoracic lymph drainage in dogs 45
Pulse oximetry
accuracy of Biox 3700 oximeter in patients receiving vasoactive drugs 484

R
Right ventricular
function: influence of breathing conditions 129r

S
Sedation
in the ICU S20
long-term, with benzodiazepines S11
midazolam and fulmazenil: pharmacology S1
midazolam in pediatric ICU patients S15
Propofol
hypertriglyceridaemia after prolonged administration 424
in tetanus: is it a muscular relaxant? 427
Selective digestive decontamination (SDD)
antibiotic levels in bronchial tree and serum 215
Severity scores
comparision of APACHE II with subjective assessments 159
measuring quality of life with the sickness impact profile 285
simplification of the SAPS by independant variables 164
usefulness for predicting nosocomial infection risk 336
Shock
Septic
adenaline: effects on hemodynamics and oxygen transport 36
effects of dobutamine on hepatic blood flow during porcine peritonitis 487
plasma lipid peroxides and antioxydants 40
relationship between oxygen consumption and the sick-euthyroid syndrome 325
vasopressin: a useful or dangerous agent? 242c
Cardiogenic
association of true and false left ventricular aneurysim 243c
following chloroquine poisoning, use of amrinone 430
Sinusitis
comparison of endotracheal vs nasotracheal intubation 125c
Sleep behavior
parasomnias affecting ICU patients 219
Surfactant
replacement in experimental pneumocystis carinii pneumonia in rats 475

T
Tetanus
sedation by propofol : is it a muscular relaxant? 427
Theophylline
and ethylenediamine pharmacokinetics in MOF 465
Thrombocytopenia
Heparin induced
recovery following low molecular weight heparin 185c
severe white clot syndrome 185c
with bilateral adrenal hamorrhage 238
Thrombolysis
after left heart catheterization: is it safe? 501
Thyroïd
endocrine abnormalities in severe head trauma 25
myxoedema coma: response to therapy 16
the sick-euthyroid syndrome: relationship with oxygen consumption in septic shock 325
Toxic epidermal necrolysis
hypothermia related to air-fluidized bed 186c, 506c
Tracheotomy
minitracheotomy and mask CPAP: a caution 436c
Percutaneous
a novel technique? 252e
comparison with standard surgical tracheotomy 261
minitracheotomy: is it simple and safe? 333
Trauma
Head
endocrine abnormalities in, 25
jugular bulb catheterization does not increase ICP 195
Tumor necrosis factor (TNF)
levels in severe malaria treated by exchange transfusion 245c

U
Ulcer
Peptic
endoscopic injection of adrenaline in severe haemorrhage 281
Stress-induced
protection of gastric mucosa by free radical scavengers 455

V
Vasopressin
use in septic shock: a useful or dangerous agent? 242c
Ventilation-perfusion (VA/Q) distribution
effect of SIMV and pressure support during weaning 136
role of extrapulmonary and intrapulmonary factors on gas exchange during weaning 249e
Vincristine
induced reccurrent laryngeal nerve palsy 304

W
Weaning
in infants using CPAP with a Seimens Servo 900C 189c
oxygen cost of breathing during, 193e
plasma cathecholamines and VO_2 during, 199
respiratory changes after open-heart surgery 365
SIMV and pressure support ventilation during postoperative, 136
VA/Q distribution during, 249e
